Installation Instructions 2811 Bracket Kit

Important Install Tip: When installing Romik HTC inserts follow the sequence below. Make sure the HTC is seated correctly and do not use power tools as this will only spin the insert and possibly damage it. Test by tugging on it before installing bracket. Blue loctite is highly recommended.

Step 1: Locate front body mount as shown, install provided HTC #3 into open hole Figure 1. Remove body mount and install bracket as shown on Figure 2. Attach to body. Do not tighten.

Step 2: NOTE on vehicles equipped with rear AC you will need to rearrange the AC hose so that it allows our bracket to mount. Simple job requiring you to loosen the clamp and move the hoses Figure 2. Install HTC #3 as shown on Figure 3

Step 3: Install provided HTC #3 Figure 4. Install rear bracket as shown Figure 5 do not tighten.

Step 4: Proceed to last page of this manual for running board install instructions and torque values

For Technical support please call our team at 1-866-717-6645 and one of our experts will assist you with this installation.

Thank you for choosing Romik.

Running Board Installation Instructions

NOTE: Use of power tools will damage the bottom of the running board and void your warranty.

RAL / RB2 / REC / RCV / RZR

ROB / ROF / RPD

- 1) Flip your Romik running boards onto a flat surface, make sure to place the running boards on a towel or cardboard in order to protect the surface Figure 1.
- 2) Loosen the M8 bolts on back of your running boards Figure 2. Depending on your model there will be either 6 or 8 bolts installed per side.
- 3) Once your brackets have been installed, place the running board onto the brackets as shown on Figure 3.
- 4) Adjust running boards, centering on vehicle. Hand tight M8 hardware on running boards.
- 5) Follow the torque procedures, torque M8 hardware to **7 ft-lbs** using a torque wrench.
- 6) Cleaning and maintaining your running boards is important, apply a light coat of a quality carnauba wax at least 2X per year. Wash often with mild soap and make sure to remove all soap residue. Many car automatic carwashes use a strong soap, make sure to use enough water to remove all residue.
- 7) Register your products at <https://romik.com/productregistration>
- 8) Warranty information at www.Romik.com/warranty
