Installation Instructions 2332 Bracket Kit

Important Install Tip: When installing Romik HTC inserts follow the sequence below. Make sure the HTC is seated correctly and do not use power tools as this will only spin the insert and possibly damage it. Test by tugging on it before installing bracket. Blue loctite is highly recommended on all metal parts.

NOTE: This vehicle requires undercarriage panel trimming

Step 1: Remove bottom plastic panel hardware. Note: Let the panel hang, it is easier to trim with it only attached from the inner most bolts. Panels below show Driver's front to rear. Figures 1-3

Step 2: Locate front inner mounting location. Remove factory rubber plug and install provided HTC #13 Figure 4. Raise the panel and notice where it makes contact with the HTC. Figure 5, make a 4 x 4 cut exposing the HTC

Step 3: Locate front outer mounting location. Remove factory rubber plug and install provided HTC #13 Figure 6. Raise the panel and notice where it makes contact with the HTC. Figure 7, make a 2 x 4 cut exposing the HTC

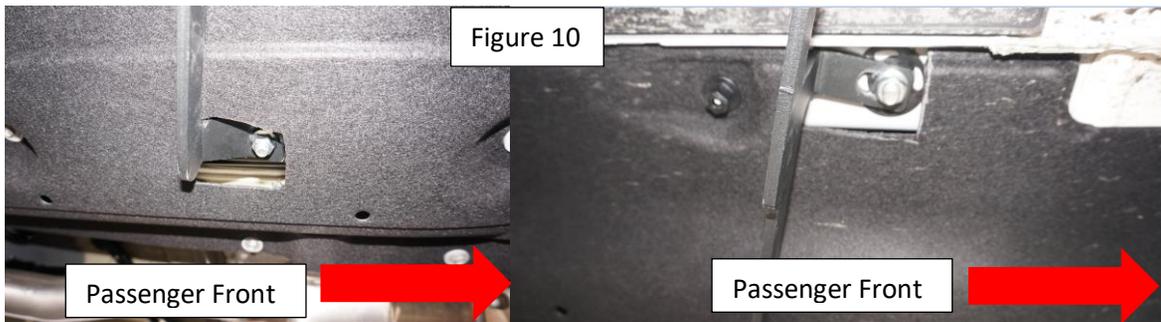

Step 4: Locate middle mounting location. Remove factory rubber plug and install provided HTC #13 Figure 8. Raise the panel and notice where it makes contact with the HTC. Figure 9, make a 2 x 2 cut exposing the HTC

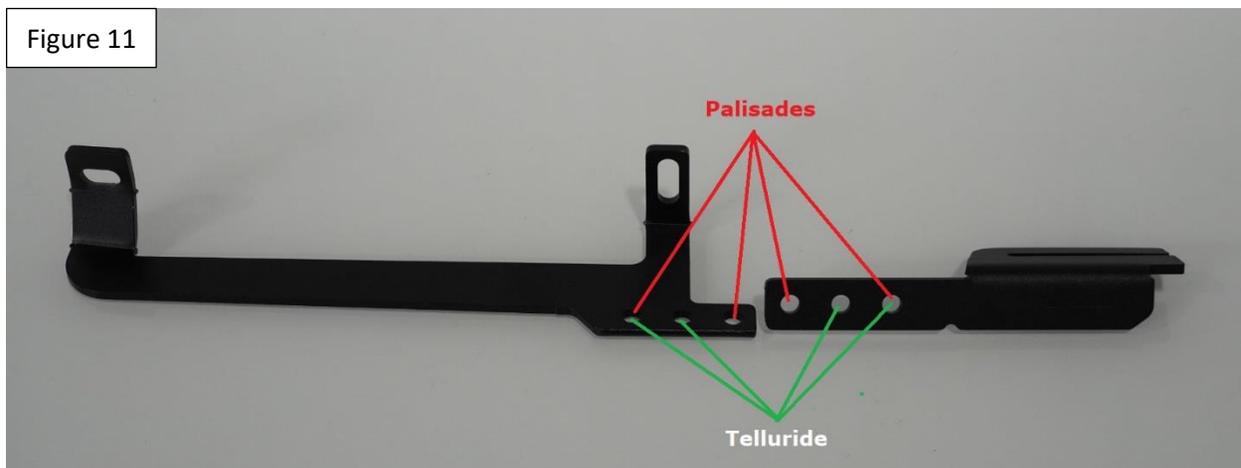

Installation Instructions 2332 Bracket Kit

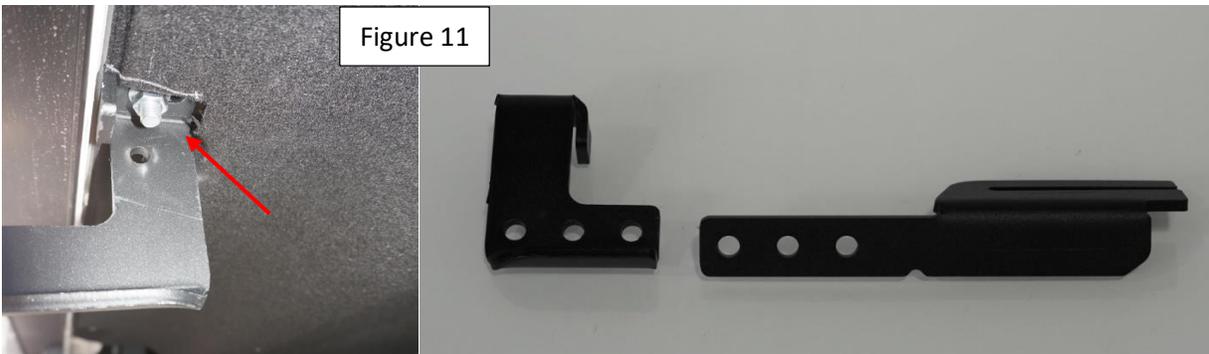

Step 5: Re-install panels using factory hardware. Install front bracket (passenger front shown) torque to specs. Figure 10

Step 6: Assemble bracket according to vehicle. Palisades use outer holes (1 and 3) Telluride use holes 1 and 2 on main bracket and holes 2 and 3 on outer part. Figure 11 Do not tighten

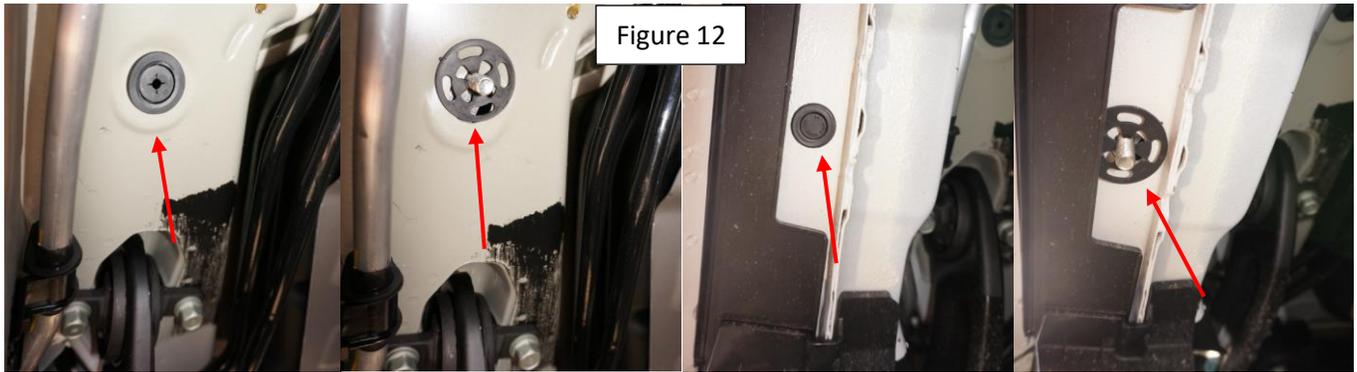

Step 7: Install middle bracket and torque to specs Figure 12. Assemble bracket according to vehicle. Do not tighten.

Installation Instructions 2332 Bracket Kit

Step 7: Locate rear bracket mounting location. Figure 12 install HTC #14 and HTC #13 as per first page.

Step 8: Install rear bracket and torque to specs. Figure 13. Assemble bracket according to vehicle. Do not tighten

Step 9: Using a level install running boards hand tight onto brackets. Once running boards are leveled tighten bracket to bracket connection and torque to 64 Ft. Lbs.

Step 10: Proceed to last page of this manual for running board install instructions and torque values

For Technical support please call our team at 1-866-717-6645 and one of our experts will assist you with this installation.

Thank you for choosing Romik.

Installation Instructions Running Boards

NOTE: Use of power tools will damage the bottom of the running board and void your warranty.

Step 1: loosen the M8 hardware on back of the running boards.

Step 2: Slide running board onto brackets

Step 3: Tighten hardware to 7 ft lbs.

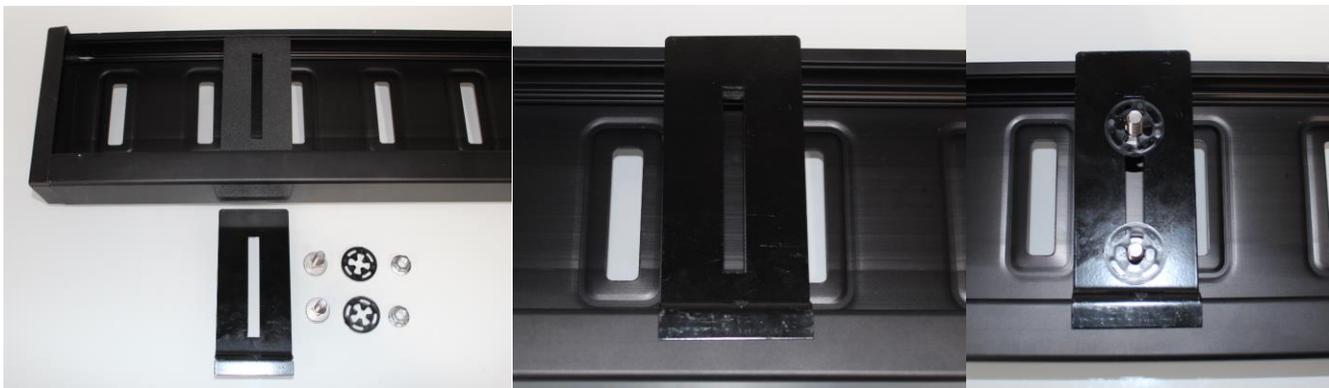

ROF/RPD/ROB Running boards

Step 1: Place clamping plate on top of running board as shown below.

Step 2: Install carriage bolts and plastic retaining clips as shown below.

Step 3: Install and tighten hardware to 7 ft lbs.

Cleaning and maintaining your Romik Running boards

Cleaning and maintaining your running boards is important, apply a light coat of a quality carnauba wax at least 2X per year. Wash often with mild soap and make sure to remove all soap residue. Many car automatic carwashes use a strong soap, make sure to use enough water to remove all residue.
